Forecast for Wednesday 29 Jun 2022

Weather: Low cloud and outbreaks of rain at first soon clearing. A blustery and showery day follows, and rather cloudy, although some brief brighter or sunny spells are possible in-between any showers. Showers potentially turning heavy around midday, with the odd rumble of thunder possible, but most hills drier through the afternoon. Further showers likely during the evening.

Chance of cloud-free hill tops above 600m: 20% at first but increasing to above 90% by midday.

Low cloud and visibility: Cloud obscuring hills above 500m at first, but lifting above most summits though the morning. A few ragged patches of cloud returning above 800m during any heavy showers. Otherwise good views expected outside of any rain, with reasonably distant hills visible. Visibility falling to poor to moderate in any rain though.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Early rain should quickly clear, and whilst sunny spells will be limited, there will still be a low risk of sunburn. Waterproof layers will be needed with the risk of showers. Very isolated thundery showers are also possible, although these are only a low risk. Should these occur, then it is recommended to descend off and away from exposed or steep ground.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Wed 29 Jun 2022	8.2mm	15.2mm	20mm

Forecast for Thursday 30 Jun 2022

Weather: Outbreaks of rain continuing through the early hours, but clearing shortly after dawn. Sunny spells then developing, but also further soon showers developing. These heavy at times, but only a low risk of thunder and lightning. Showers are likely to ease during the late afternoon with some warm sunshine developing.

Maximum wind: Southwesterly 10-15 mph. Chance of isolated gusts 20-30mph near any heavy showers.

Chance of cloud-free hill tops 600m: 30% at first, improving to 90% during the day.

Low cloud and visibility: Areas of cloud at 500m during the early hours, lifting above the summits through the, but ragged patches returning above 800m during heavy showers. Otherwise good to very good views, with distant hills visible but becoming moderate to poor in any heavy showers.

Temperature: **Valleys:** Plus 9 Celsius rising to Plus 18 Celsius
At 600m: Plus 8 Celsius rising to Plus 12 Celsius
Freezing level: Above the summits.
